

“Healthcare is a key factor and one of the major building blocks toward a healthy, inclusive society. Everyone deserves access to affordable and high-quality healthcare. Even though the fabric of Indian Healthcare is intertwined with multiple complex issues, several applaudable initiatives have been undertaken by the honourable Government in terms of preventive healthcare and diagnostic programs. As India enjoys the population dividend, it is very imperative that we promote a healthy and active lifestyle and champion the promotion of awareness. Being aware of things by itself helps solve half of the problem at hand. Let us each pledge to play a part in the promotion of health awareness and promote a healthy lifestyle.

Siu-Ka-Pha Multipscialty hospital wishes everyone a very happy Independence day. It pledges to be continuous in its efforts to promote health awareness and be active in community upliftment programs”
